Upland Game Season Closes in New Jersey Next Saturday; Also Deer Hunting in Pennsylvania and Maine

PLUGGING FOR **CHANNELS AN ART**

Angler in Florida Waters Takes Bass of 32 Pounds on 5 1-2 Ounce Rod.

WOMAN FIGHTS FISH HOUR

BY FREDERICK A. BISHOP.

NEW SMYRNA, Fla., Dec. 8 -- Much has been said and written about plugs pluggers, and judging from artiwhich appear from time to time in the Rod and Gun column of THE Sun I am fully convinced that many contributors to that column know little or nothing about plus casting. Some who cast files or fish with live or cut bait or troll from boats go so far as to claim that no true sportsman would use a plus. would use a plug. One of these writers states:

To use a plug, which is a thing a fish cannot or will not eat, but merely resembles something he can eat, is to practice deception, while to use a hook baited with a real estable balt is no deception. Those who use pluge take the op-posite view. One challenging this state-

Pluggers' and Non-Pluggers' Views Another plugger writes:

Another plugger writes:

All tripple hooks which I have seen are not shaped to secure the best angle of penetration, and hooks rigidly attached to artificial minnows and plugs are similarly deficient, so that many fish strike and break away for this reason.

In an extensive experience fishing wits spinner for game fish I found that in the case of a very lively fish a single hook landed about three times as many hooked fish as a regular triple hook.

And we snother writes: And yet another writen:

And yet another writes:

Formerly I thought nothing of putting a sharp hook through the head of a squirming frog that made frantic efforts to tear out the torturing thing with his handlike front paws and even uttering a pitcous vocal sound in his agony.

I don't use live frogs now and have not for several seasons. The sight of their suffering soon induced me to stop this gruelty when I discovered how unnecessary it was since I devised a way to catch base with dead ones. From that time on I cultivated the habit of killing the bait before using.

divisied the habit of killing the balt before withing. Then there was introduced in the market certain wooden plugs that would go through paculiar grations in the water when recled in. Eureka: Just what was needed. Now I use plugs exclusively—not those with five triple hooks, but the smaller, having but three—and I break off two barbs on each of the triple hooks. It is my experience that the live frog of a certain size is the deadliest lure for large mouth bass in existence. With the Kext comes the dead frog. With the Next comes the dead frog one or two out of the triple hooks. One morning out of thirty strikes I had in the Rideau Lakes I landed but three bass. That is one out of feet strikes on a glug having but one point on each triple hook.

When here are plentiful it makes the

base. That is one point on each triple plug having but one point on each triple hook.

When base are plentiful it makes the sport more interesting and more uncertain and gives the fish a chance. If you must have base to eat—must absolutely have, as for a shore dinner—use live frogs; but if you want sport, excitement and comic stunts use plugs.

Great Changes in Plugs.

Those of you who use plugs well know the great change which has taken place in their manufacture in the last two or

The Wilson wabbier is a good surface chance. Of late some sportsmen ask plug. But even this will go under too for a written guarantee. They have far to suit me when reeled in fast, so I said over their signature they would not whittle most of the plugs which I use come unless the guide would guarantee

but each day is gaining recruits, not from those who might be classed as beginners, but from the well seasoned angler.

I don't claim all plug casters are any one claim that all non-pluggers are sportsmen, but in the five winters that I have fished Florida waters I never met one non-plugger who did put a fish back in the water because it was under size, but I have met several plug casters who did return all bass two winters who did return all bass two winters who will be a good Baptist. His conscience troubles him somewhat, but should return all bass two in the slightest idea what a sportsmen are not sportsmen. All classes of fishing have those who have not the slightest idea what a sportsman is.

An article by Hartie I. Phillips which appeared in the Rod and Gun column.

It is expected that the licenses for the last three nesting a man is.

An article by Hartie I. Phillips which appeared in the Rod and Gun column.

It is expected that the licenses for the moving shrubbery from decided that he would follow the blood tracks. The guide discouraged that the deer must be at least two or three miles away.

Strangely the deer did not drop in its tracks, much to his chagrin. He stood tracks cannal as sportsmen and one that all clocks that he would follow the blood tracks. The guide discouraged that the deer must be at least two or three miles away the decided that he would follow the blood tracks. The guide discouraged this, explaining that the deer must be at least two or tracks could be conservation commission.

The commission has already analyzed the conservatio

An article by Hartle I. Phillips which An article by Hartle I. Philips which appeared in the Rod and Gun column some months ago related how an angler, fishing with a 4½ ounce Hedden rod and 600 feet of nine thread line, had landed a forty-four pound barracuda. Certainly this is a feat to be proud of, the thread line had landed a forty-four pound barracuda. but the reel must have been a good sized one to carry that much line. My way of thinking, the boating of fish from twenty State disposed of 1,600,000 to private in-to thirty pounds on a plug and casting dividuals. compares favorably with if it does not excel it.

Thomas N. Burkett of Lincoln, Neb. has caught more fish weighting twenty five pounds or more on these light rods

than any one I have met.
On April 6, while fishing at the reefs in the Gulf three or four miles outside the mouth of Crystal River, he boated the mount of crystal river, he boards ten channel bass of the total weight of 242 pounds, the smallest twenty and the largest thirty-two pounds. He and his wife have been fishing in Florida waters, for years, usually going there before 242 pounds, the smallest twenty and the largest thirty-two pounds. He and his largest thirty-two pounds. He and his largest thirty-two pounds. He and his wife have been fishing in Florida waters for years, usually going there before the holidays and remaining until April.

They used to troll and still fish and bring in more pounds of fish than any boat on the river, but now both are en thusiastic pluggers and do not do any

World's Record Swordfish Taken on Light Tackle JUMP JUMPS LIGHT

Burkett fishes for tarpon.

Mrs. Burkett was high hook up to the time I left Florida on March 5 last having brought to gaff a 2315 pound channel bass on a 515 ounce bamboo rod, silk line and casting reel, although it

GIVES GUARANTEE

Thing': Although Conscience Troubles.

in their manufacture in the last two or three years. Nearly all the first ones had spinners and four or five sets of sang hooks and would sink. Most, of the latter series are made without spinners and will float.

Some of these have devices which cause them to wiggle and also go under the surface from six inches to two or three feet, according to how fast you reel. Lots of them have too many sets with the formal than the first ones. Most of the story has to have a date line, but it cannot be expected to conform to newspaper uses and print names. There are various reasons. Perhaps the guide is to blame; perhaps some of it belonge to the hunter. The preliminaries over, now to the story.

In the old days men planning to go puriting in Maine for deer were apt to

the surface from six inches to two or three feet, according to how fast you reel. Lots of them have too many sets of hooks, but others two sets of gangs and some have two or three single hooks.

The Wilson wabbler is a good surface the number. The preminantes over, now to the story.

In the old days men planning to go hunting in Maine for deer were apt to write. "Is there a chance for a shot at a deer?" They were sports who took a chance. Of late some sportsmen ask

The Wilson wabbler is a good surface plug. But even this will go under too far to suit me when resided in fast, so I whittle most of the plugs which I use from a piece of cedar or some other light wood with a penkinfe; never use more than two sits of gange, three night wood with a penkinfe; never use more than two sits of gange, three night have been suited as guide turn down a good chancer to make good with these sportsmen with grant the suited would gazinet to make the plugs in the many than the property was before a colors, and an extended to the colors or shapes get to the fall.

I will venture a guess that it will not be many veran before the outful of the many kinds, shapes and colors, and any who now fish will live or cut that or troll will put aside rost, hocks, illnes, sinkers, éc, used in that kind of fashing.

For, when you once aggretance the fall of the color of shales, increase in all other water interest in all other kinds of fishing in petins to ebih.

And, after you get out of the halt of the plugs and farly go get out of the halt of the plug grant shall be performed in the stand of the plug casting is also an art. I belong to the class that think eliging casting is also an art. My way of thinking, plug casting is also an art. My way of thinking, plug casting is also an art. My way of thinking, plug casting is also an art. We way to the should a guide turn the put of the plug and bear the put of the plug casting is also an art. I belong to the class that think eliging casting is also an art. We way to the should a guide turn down a good chancer to make the put of the put of

TACKLE RECORDS

AVALON, Cal., Dec. 8 .- Catalina Island has enjoyed this year its best fishing season for nearly twenty years. It was cemarkable not only for the large number of big game fish taken—leaping tuna, broadbill swordfish and marlin swordfish-but for the records that were

W. C. Boschen of New York city cap-tured the world's record broadbill swordfish on heavy tackle, 463 pounds, exceeding the previous club record of 362 pounds made by Hugo R. Johnstone. I had the good fortune to take the largest marlin swordfish ever taken on light tackle (six ounce tip, butt not exceeding fourteen inches, nine strand line)—185 pounds. Also the only red button leaping tuna (fifty pounds or over) ever taken on 2-6 tackle (six

ounce rod, butt not to exceed twelve inches, six strand line). It weighed fifty-seven pounds. In all 8 broadbill swordfish, 72 spearfish (marlin swordfish) and 362 leaping tuna were caught and recorded on the books of the Tuna Club of Santa Catalina Island during the season. Fifteen of the leaping tuna weighed over 100

Light Tackle for Leaping Tuns.

Five of these red button tuna were taken in one day's fishing. Weights: 54 pounds, time 9½ minutes: 59½ pounds, time 6½ minutes: 53 pounds, time 5

minutes: 61 pounds, time 22 minutes; 58 pounds, time 2 minutes. The last mentioned fish tangled his tail in the leader. which accounts for the short period taken to land it.

My gold button tuna caught on three-six tackle was brought to gaff in just

Dolly Varden, Queen of All.

It pleaseth me much to declare
A rabbit as game as a hare,
But the gamest black bass
Can never surpass
The qualities game
Of a very fair lass
Adored in the North,
The East, South and West.
An ideal in form,
Pascinatingly dressed,
Delicate pink,
Immaculate clean. Immaculate clean.
Toothsome and sweet,
The fat and the lean;
Epicurean feast,
Fit for a queen—
Dolly Varden.
You're A FISH!

Herewith is a bill designed to save from extermination in this State at least that interesting, harmless and valuable animal the black bear:

Black bear may be taken in any manner except with traps from October 10 to December 15 and possessed from October 10 to December 31, both inclusive. No persons shall take more than two black bears in any one season. This act shall take effect immediately.

As suggested in The Sun of December 2, something along this line must be done or we shall in the near future see the last of the black bear in every portion of our State except in zoological That common kind of pond and grass That common kind of pond and grass That emmin kind of pond and grass That emmilia so sickly of the mud. You set a swift pace for the "man from

be done or we shall in the near future see the last of the black bear in every portion of our State except in zoological collections. This bill is one that I endeavored to have passed by the last Legislature, but did not succeed. I the last Legislature, but did not succeed. I the will be introduced again.

You will observe that the bill prohibits the use of traps in taking bears, and I believe most sportsmen know that there are other and sportsmanlike ways of bagging bruin, and the use of the trap is entirely unnecessary.

There are animals that must be spreak.

Light Tackle for Lesping Tuns.

The fact that the great majority of the leaping tuns caught this year weighed less than 100 pounds each produced one result not anticipated at the bestimning of the season.

This was the exclusive use later in the season by myself and one or two other angiers of light tackle in fishing for leaping tuna and later in the season by myself and one or two other angiers of light tackle in fishing for leaping tuna and later in the season in fishing for swordsh.

It was all in the interest of "more aport and fewer fish" and of "elevating the standard of sport" as proclaimed by the Tuna Club, and to demonstrate in the most practical way that not merely one but a number of these big game fish may be taken on light tackle in the sungler but sets his mind to it.

Nor need there he any smashing of tackle provided the proper precautions are taken. I caught eleven red button leaping tuna (over 50 pounds each) on light tackle without breaking a rod or even a line.

Five of these red button tuna were Hunter's Parewell to the Forest.

the few left us, so that we may at least prevent their extermination.

For the forest primeval nursed me And taught me the secret of life. Then man walked with God in its shadows And forget the world's passion and strife. But the greed of the vandal commerce Will steal from old earth its pride, And the richest gift of the ages Be stripped from the mountain's side.

The Old Beg.

I was sitting there amidship on the good ship Rosabell.

Just a smoking and a dreaming as the old boat rose and fell.

For the sunshine-it was pleasant—most delightful was the scene.

And I love to small the marshes and to hear the seaguils scream.

All the boys were fixing tackle—speculating, by the way.

How they were going to nall 'sm on that when I happened just to notice lying there upon the hatch an old bag full of tackle, and I never saw

There was all the seaguils and I never saw the seaguils and the seaguils and I never saw the seaguils and I never saw the seaguils and I never saw the seaguils are the seaguils and I never saw the seaguils are the seaguils and I never saw the seaguils are the seaguils and I never saw the seaguils are the seaguils and I never saw the seaguils are the seagui

There were sinkers, big and little; ea, there must have been a score; There were some for deep sea fishing, some for flounders, then some more; There were hooks—about a million—hooks for all the fish that swim; There were reels and lines, disgorges, and a scraper made of tin. So it got me, boys, a thinking as I looked upon the hooks.

Thought of all the fish a swimming in the ocean, lakes and brooks; Brought to mind the time when porgles, iridescent in the sun, when they're coming thick and heavy—oh, I tell you that's the fun! Yes, I saw the pergies shining coming from an azure sea,

Yea, I saw the porgles shining—coming from an asure sea.

Scintiliating and prismatic, sometimes two and sometimes three;
Then I saw a hook for sea base, and it when I hope to get a numpback at the end of my good line.
One with purple fine all dripping with the coean's foamy spray.
For there's naught on earth to beat it, and I guess you say the same, lads; sure you know of all these joys.
For we all have gone a fishing since the time that we were boys.

And then I saw a larger hook—a great high prook for ced.
Reminded me of winter and my old bank fishing role aster—with Jake there on the proof of friend Louis Harms.
Our fishing boat a heaving like she'd never right again.
A shipping "greybacks" for ard, while the greaty drovs in like r.in.
It was there when we were rolling, it was there we struck 'em fine: It was this made life worth living—this is your thought—and 'tis mine:

Fo I sorted out the tuckle in that rusty fishing beg.

The college of the color of age and who are necessary to can generally pass muster for 60 years or less. Fishermen who are over 70 can generally pass muster for 60 years or less. Fishermen who are regulars on eithing fishings boats who will tell you that they are 60 of 65 years old, and your answer is: "Why I thought you were about so the truth they are over 70 years younger than their real ages. The out-time, the getting of business and professional cares and the mociety of democratic as. Sociates tend to defeat the ravges of age.

Fishermen who are regulars on either and old chaps who are regulars on eithing fishings boats who will tell you that they are 60 of 65 years old, and your answer is: "Why I thought you were about so the truth they are over 70 years younger than their real ages. Health and old gags go with fishing. There are 60 of 65 years of age are really ten years of age are really ten years younger than their real ages. Health and old gags go with fishing. There are 60 of 65 years of age are really ten years of age are really ten years of age are really ten years of age

So I sorted out the tuckle in that rusty

Fo I sorted out the tackle in that rusty fishing beg.

While my shipmates all around me never ceased to chew the ray.

Tos, I just sat there a dreaming of the many happy days.

That we all have spent together out at seat and in the bays:

Dreamed of sciemn visaged blackfish, of the sunrise and the aunset—of the sea birds on the wing.

When I was brought to earth again by Captain Georges' shout.

"We're on the Banks my bully boys, so cast your tackle out?"

ARTHUR THORNTON.

November 23, 1917.

A Fishing Smack.

The toss and swing of a fishing smack, the pull of the sail on the starboard tack, the saily smell and the fresher air. The tang of the sea and the herder fare.

Heave, Heave, Heave, Heave, the swell of the occan, the horizon far, the swell of the occan, the horizon far, the swell of the occan, the horizon far, the swag and draw of the language sheet.

Heave, Heave, Heave, The foam of the soa and the briny deep, the foam of the soa and the briny deep, the straining mast, the search for fish, and more of work than one would wish. Heave, Heave, Heave, Heave, the distant sand, the danger deep, the safety of land. The danger deep, the safety of land. The dash and flash of white seaguil. The crack and creak of wooden hull.

Heave, Heave, Heave, Heave, the sippers sline of the fishing deck. The stench of grog from a human wreck.

Heave, Heave, Heave, Pleasures of land are nothing to me, tive me the roll of the angry sea. The rising wind and skies that are black. The toss and swing of a fishing smack.

Heave, Heave, Heave, Heave,
